

IMPACT CONTROL BUFFERS *your single source of supply*

- *Designed and manufactured to suit Australian conditions, Conductix supplies rubber and cellular polyurethane buffers in a wide range of sizes.*
- *Typical applications include cranes, conveyors, electric vehicles, materials handling equipment and other moving machinery.*
- *Conductix are the experts in supplying power and control to moving machinery, with expert technical and application advice offered on request.*
- *Suitable for flat plate or single stud mounting arrangements.*

RUBBER BUFFERS

Manufactured from a moulded neoprene rubber and with a protected steel backing plate, Conductix rubber buffers are suitable for the most arduous applications. A wide range of sizes are available and application charts assist with easy and accurate selection.

POLYURETHANE BUFFERS

For applications requiring greater shock absorption, these buffers are manufactured from polyurethane elastomer in a micro-cellular form. They feature a patented steel structure moulded into the backing plate and are available in a range of sizes.

FLAT, FLEXIBLE ELECTRICAL CABLES your single source of supply

- Designed and manufactured to suit Australian conditions, these flexible cables are suitable for use on cranes, cable festoon systems, cable reels and moving machinery.
- Conductix are the experts in supplying power and control to moving machinery, offering expert technical and application advice on request.
- A wide range of cable is available in PVC, neoprene rubber, screened and unscreened.
- An extensive range is held in the Conductix Melbourne and Sydney offices.
- Very competitive pricing.

FLAT CABLE

Conductix stocks an extensive range of flat PVC cables for general purpose applications, all manufactured to international standards. Conductix also supplies flat neoprene cables for more arduous and external applications. Please refer to the accompanying technical specifications for more detail or consult your Conductix representative.

PENDANT CABLES

Pendant cables are supplied with 2 outer steel support wires for use with crane pendants, hoists, lifts and other materials handling equipment. The outer wires are fixed at each end to restrict distortion and support loads while protecting the electrical cable from damage.

REELING CABLES

As one of Australia's largest suppliers of cable reels, Conductix can supply highly flexible round cable suitable for use on cable reels or cable chain. These cables range from small 3 x 3 core cables to multi-core power and control cables incorporating fibre optics for use on large mining and industrial machinery.

CABLE GLANDS

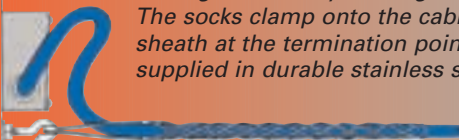

Conductix supplies a range of cable glands to suit the wide range of cables supplied. The glands are manufactured from plastic, brass nickel-plated or aluminium. Refer to the Conductix technical specifications for the gland part number to suit your chosen cable.

CABLE SOCKS

Cable socks are used to protect round reeling cables from the shocks generated by moving machinery.

The socks clamp onto the cable outer sheath at the termination point and are supplied in durable stainless steel.
